Rate of Capability Utilization*

Monthly	Yearly
xx.6 %	xx.6 %

* Utilization is based on tonnage capability to produce Raw Steel for a sustained Full Order Book.

Notes: Raw Steel is defined as Steel in the first solid state after melting suitable for further processing or sale, including Ingots, Steel for Castings and Continuous or Pressure Cast; Blooms, Billets and Slabs. Figures are Preliminary and Subject to revision. Year to Date totals include revisions for previous months.
